Pesticide residue and contaminants analysis for fruits, vegetables and related products

name	CAS RN	method *	applications **
Zineb (as CS2)	12122-67-7	S-15	F
Ziram (as CS2)	137-30-4	S-15	F
Zoxamide	156052-68-5	SCR-A	I, F

* methods:

SCR = screening methods, S-15 = dithiocarbamates, S-24 = organotin compounds, S-25 = methylcarbamates,
E8 = acidic pesticides, S-A+ and S-B+ = other multimethods, E = single methods

** applications: A Acaracide, F Fungicide, H Herbicide, I Insecticide, M Metabolit, N Nematocide, O others
S Synergist, W Plant growth regulator

** LOQ: limit of quantitation is validated according SANCO/12495/2011. The LOQ mentioned for the single pes
components is based on foodstuff produced from plant material. In other products and in rare special c
limit may be higher depending on the individual matrix.
