## \* methods:

SCR = screening methods, S-15 = dithiocarbamates, S-24 = organotin compounds, S-25 = methylcarbamates,  
E8 = acidic pesticides, S-A+ and S-B+ = other multimethods, E = single methods

\*\* applications: A Acaracide, F Fungicide, H Herbicide, I Insecticide, M Metabolit, N Nematocide, O others,  
S Synergist, W Plant growth regulator

\*\* RL: reporting limit is validated according SANTE/11312/2021v2026. The lowest level  
at which residues will be reported as absolute numbers. The RL mentioned  
for the single pesticide components is based on foodstuff produced from plant material.  
In other products and in rare special cases the limit may be higher depending on the  
individual matrix.
